APPLICANT: Cohen, Ling
TITLE OF INVENTION: WACCINES EXPRESSING CODON OPTIMIZED HIVI
TITLE OF INVENTION: WODIFICATIONS
FILE REFERENCE: 20747Y
CURRENT APPLICATION NUMBER: US/09/952,060
CURRENT APPLICATION NUMBER: PCT/US01/28861
PRIOR APPLICATION NUMBER: FCT/US01/28861
PRIOR APPLICATION NUMBER: 60/317,814
PRIOR APPLICATION NUMBER: 60/317,816
PRIOR FILING DATE: 2001-09-15
NUMBER OF SEQ ID NOS: 38
SOFTWARE: PastESEQ for Windows Version 4.0
SEQ ID NO 27
LENGTH: 1521
TYDE: DNA
CORANISM: Artificial Sequence
FEATURE:
COTHER INFORMATION: Codon optimized DNA encoding human HIV-1

/note="Organ: Root; Vector: pME18S-FL3; Site 1: XhoI;
Site 2: XhoI; The library was prepared from polyA+ RNA
from 8-day-old roots harvested from BTx623 sorghum
seedlings grown in hydroponic culture. HCl was added to a
pH of 3.0 to some seedlings, KOH to a pH of 9.0 for
others. Roots were harvested 3, 12 and 27 hr after
addition and pooled for RNA preparation. Double-stranded
cDNA was cloned unidirectionally into different DraIII
sites of the pME18S-FL3 vector (5-prime DraIII site is
CACTGTGTG, 3-prime DraIII site is CACCATGTGG). XhoI excises

/note="Vector: lambda ZAP Express/pBK-CMV; Site_1: EcoR1
(5' adaptor); Site_2: XhoI (3' linker primer); The mixed
organ cDNA library was generated using the ZAP-cDNA method
by Stratagene. First strand cDNA synthesis was primed with
a a 50 bp linker primer containing an oligo dT sequence
preceded by a synthetic XhoI site. 5 prime adaptors were
used containing an EcoR1 cohesive end. The finished cDNAs
were inserted in to the ZAP express vector
unidirectionally in the sense orientation with respect to
the lac2 promoter of pBK-CMV. An amplified library was
prepared from approximately 3 million primary clones in
the lambda ZAP Express vector. In vivo excision was then
used to generate individual pBK-CMV phagemid clones for
EST sequencing."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Conservative
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 /mol
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      /strain="Salinas river,

pBluescript SK(-); Site_1: ECORI; Site_2: XhoI; Hydroponic
pBluescript SK(-); Site_1: CORIF SITE_2: XhoI; Hydroponic
pBluescript of California, Davis (E. Akhunov
and NaCl for either 12 hours or 7 days. Root tissues of the
plants gubjected to both types of treatment were collected
separately at University of California, a cDNA library was prepared
separately from the two samples (12h and 7day treatments),
and equal amount of RNA was then pooled. PolyA RNA was
purified from the pooled RNA, a cDNA library was made, and
the cDNA clones were in vivo excised to give pBluescript
SK(-) phagemids in J. Dvorak's lab (E. Akhunov, J. Dvorak)
at the University of California, Davis. Colony plating,
plasmid DNA preparations and DNA sequencing were performed
in the OD Anderson lab (all other authors)."

If you are interested in getting corresponding physical clones, these are publicly available from ZmDB and may be found by BLAST searching at MSL, maizemap.org; ZmDB, www.zmdb.iastate.edu; TIGR, www.tigr.org; or NCBI, www.ncbi.nlm.nih.gov. When the source of t maize cDNA sequences is either Virginia Walbot, Stanford or Pat Schnable, Iowa State, then clones may be requested from ZmDB:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Zea mays

/note="Organ: Crown and leaf; Vector: pCMV.SPORT6; Crown
(50%) and leaf (50%) tissues from wheat cultivar Norstar after
after short exposure times to low temperature in the light and in the dark. 12 mRNA populations were combined before constructing the library. The first 6 populations: After 7
days of growth at 20, wheat plants were transferred to 4C in the light. 1cm crown sections and green leaf tissu were separately harvested after 1, 3, and 6 hours of low temperature exposure. The last 6 populations: After 7 days of growth at 20C, wheat plants were transferred to 4C in the dark. 1cm crown sections and green leaf tissu were separately harvested after 1, 3, and 6 hours of low temperature exposure. First strand synthesis in this library was done in the presence of methylated dCTP thereby protecting from internal cleavage with Not1. In addition, this library used a primer for second strand synthesis that annealed to an artificial sequence (RNA sequences from EST generated from this library will be measted for vector and adaptor and additional sequence and additional sequenc
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Triticeae; Triticum.
